**Fires Reported in FireRMS – page 1 of 2**

September 4, 2013, 3:02 a.m. - Called for a structure fire on Oakhill with fire reported visible from the roof. Arrived to find nothing visible but the smell of smoke noted in front of the structure. Engine 11 assigned to investigate, Truck 12 assigned to search group, Truck 11 assigned to vent group, Medic 11 assigned to RIT and Medic 12 assigned to rehab. Smoke was noted coming from the roof B-side but unable to complete a 360 due to obstructions and a shallow lot. Two LFD engines and their B-41 were called to assist. A callback of 10 EL personnel was ordered also. The search group located the fire on the second floor, C-side. The vent group reported that the fire was visible on the flat portion of the roof over the C-side addition. A box of fireworks was also noted on the flat portion of the roof. LFD E-48 assigned to overhaul. The fire inspector was contacted and the 2nd LFD engine cancelled. The EL personnel callback was stopped after 2 were contacted. Medic 121 placed in service while operations were still in progress. Once fire operations were done the scene was turned over to the EL Fire Inspector and the fire rigs cleared.

September 5, 2013, 5:12 p.m. - Dispatched for a fire alarm at Rather Hall. Truck 12 responded emergent with 3 on board. Requested an MSU trouble truck while en route to the scene. Dispatch advised that there was light smoke in the hall but no fire. Fire personnel arrived at 4 story structure with nothing visible from the exterior, visual alarms noted, command established and investigating. Firefighters arrived on the 3<sup>rd</sup> floor to find a light haze in the hall. The RA for the floor showed firefighters the room and what had occurred. There was a pillow and bed sheet in the middle of the floor along with a "clip" on a lamp. The pillow had a large burn to the middle of it, the bed sheet had a small amount of damage and the lamp had minimum damage to the shell. The student said the lamp got stuck between the pillow and edge of head board. He was sleeping when it occurred and said his head began to feel warm. The items were removed from the bed and laid on the floor. No harm to the person occurred. The 3<sup>rd</sup> floor was ventilated of smoke, information gathered from the students in the room and the pillow was removed to the outside. Fire personnel also spoke with an MSU Police officer on the scene who advised we did not need to contact the MSU Fire Marshal. Dispatch advised of this information and the panel was reset back to normal. Command was terminated and Truck 12 cleared to return to quarters.

## **Training Reported in FireRMS page 2 of 2**

August 29, 13013, 1:30-2:00 p.m. – Station 2 on duty personnel had review of the fire officer meeting notes.
