Fire Reported in FireRMS

October 22, 2013, 6:19 a.m. – EL Fire responded to a call on Lake Lansing at N US 127 for a semi with its axle on fire. Arrived to find that the fire was out and had been extinguished by the driver prior to our arrival. Engine 11 assigned to investigate the area that was reported on fire. Truck 11 assigned to block traffic. Police were contacted via dispatch to help with traffic control up stream. While waiting for police to block an accident occurred so another police unit was requested to take the report. The driver contacted a towing company and once the police arrived to block firefighters used some construction barrels to block the service lane to provide protection for the wrecker. All units cleared.

Training Reported in FireRMS

October 23, 2013 – Fire Streams – The on duty Lieutenant instructed all on duty personnel on quick calculations for water friction loss in the classroom. Both stations then responded to Hamlet Circle for drilling on hose streams, water flow and basic hose evolutions. Fire personnel also touched on proper hose deployment and storage.

October 24, 2013, 1:00-3:15 p.m. – Other Hose Training – All on duty personnel participated in training on hose line operation and rig placement.
