Total number of incidents responded to: 106

EMS/Rescue = 83 Fires = 2

Good Intent Calls = 5 False Calls = 16

Fires Reported in FireRMS

April 26, 2017, 4:32 p.m. - Called for fully involved structure fire assist to BTFD. B-11 arrived to find some damage to an AC unit, and smoldering mulch, but no fire. Occupants put out what appeared to be discarded cigarette thrown in mulch fire, with extinguishers. We mopped up and investigated until BTFD had enough personnel on scene to take over. Cleared and returned to station 1.

April 26, 2017, 4:40 p.m. - T-12 was dispatched to a car fire near Demonstration Hall. T-12 in route when notified this was a possible brush fire. T-12 arrived in area to find MSU PD on scene with bus that was on fire. T-12 arrived to find bus stopped on roadway with fire coming from rear exhaust near roof area. Driver states everyone off the bus. He was driving when he saw excessive white smoke from rear of the vehicle. I noted oil sprayed on roadway and a puddle beginning under the engine in rear of the bus. T-12 crew pulled a hose line for extinguishment. T-12 accessed the engine compartment and saw no active flames any longer. It looks as though oil sprayed within engine area and onto the exhaust system where it caught fire. No major fire damage noted. T-12 crew placed peat sorb under bus to contain leaking oil. T-12 awaited mechanic and tow vehicle. Mechanic stated that the bus blew a "turbo". Vehicle was towed away and T-12 continued with residual clean up. T-12 used approx. 1# peat sorb to clean motor oil.

Training Reported in FireRMS

April 25, 2017, 11-12 a.m.-Other Administration Training- Ambulance billing company presented information about our EMS run reports. The object is to fill out all the necessary information to get insurance companies to approve payment for ambulance service.
