Weekly Incident Report for

November 21 – November 29, 2017

Total number of incidents responded to:

EMS/Rescue =73 Fires = 2

Good Intent Calls = 108 False Calls = 8

~~~~~  
**Fires Reported in FireRMS**

**November 26, 2017, 12:20 PM-** Dispatched for fire standby with LFD. Arrived on scene and cleared shortly after arrival by command.

**November 28, 2017, 3:46 PM-** T-12 was dispatched to a fire alarm. T-12 at large 6 story structure with nothing showing and no one evacuating from structure. T-12 found fire alarm panel showing smoke activation on 4th floor room #401. T-12 investigated to find student still in lab where activation occurred. Lab was isolated and alarm was silenced per IPF by request from me. I then investigated to find that student was boiling a compound in a water bath when he left the project unattended and the container or pipes melted after water bath ran dry. Student states he was boiling a compound of approx. 50 ml (SDS detergent w 200 mcg of crude bacterial). T-12 investigated room monitor showing normal readings throughout. I found that there was a gas burner with a metal pan sitting in front of it with metal plastic melted inside. The compound was in a plastic pipe sitting inside of a plastic tubing or pipe holder. T-12 requested EHS for follow-up. T-12 gathered info. And awaited EHS's arrival. Information was passed onto EHS and T-12 cleared the scene and returned to Station #2.

**Training Reported in FireRMS**

**November 21, 2017, 1 hour-** Rose exterminators provided class on bedbugs.

**Chief Complaints of EMS Call**

No Complaint-8

Abdominal Cramps-1
