Weekly Incident Report for

November 30 – December 6, 2017

Total number of incidents responded to:

EMS/Rescue =89 Fires = 1

Good Intent Calls = 118 False Calls = 3

~~~~~  
**Fires Reported in FireRMS**

**December 1, 2017, 2:16 AM-** Dispatched to fire alarm sounding. Once Enroute, upgraded by dispatch from occupant that there was a fire in a microwave but the fire is out. Arrived and found nothing visible and occupants evacuated and heard fire alarm sounding. Met occupant/employee who stated she was alerted of a fire in the microwave in the basement kitchen. She went to the area and extinguished the fire. Unknown how she was alerted or what she used to extinguish the fire. The fire was contained to the inside of the microwave. Damage noticed inside the microwave (melted plastic on the door). The inside of the microwave was full of soot, on all sides, with a black pile of ash/melted substance on the tray. There was a light layer of smoke in the kitchen. No damage or soot on the surfaces of the kitchen immediately surrounding the microwave (counter top below, cabinet above, cinderblock wall to the side). Microwave warm to touch. Took photos 5 and attached in email to Fire Prevention. Microwave still plugged into wall and there was still power to the microwave and the GFI was not tripped. Unplugged microwave and moved out of building and placed on concrete pad on Charlie side of building. Opened windows to air out kitchen. Reset fire alarm to system normal.

**Training Reported in FireRMS**

**December 6, 2017, 1 hour-** Fire Fighter gave class on sepsis.
