Fires Reported in FireRMS

March 13, 2018, 9:07 AM- T-12 dispatched to possible structure fire per T-11. T-12 arrived and Level 1 staged. T-12 contacted by B-11 notifying he was a ways out and to est. Command. T-12 est. Ivy Command. T-11 reporting in apartment that something was on fire underneath bed. T-11 requesting ventilation and they report fire is out. Command cancelled M-11's response. M-12 ordered to ventilate building. T-12 crew est. and ordered to search for extension or issues in #435 and #235. Command requested all units go to Metro #1. T-11 reporting they have overhauled the area and they can handle. Command requested Fire Prevention from MSU to scene. T-12 reported no extension or smoke issues on 4th as well as 2nd floor. T-11 requesting a reset for the fire alarm. T-12 reset fire alarm to normal operation. T-12 and M-12 cleared from scene. Command transferred to T-11 to remain until FP arrives. T-12 returned to Fire Main and cleared the scene.

March 13, 2018, 11: 32 PM - Emergency call back for structure fire. Instructed per DC to report to St #1, collect people, and then contact Command. 6 additional personnel arrived at St #1. Assembled E-11 and M-111 and reported to scene per Command. Given assignment of Charlie Side Safety replacing Lansing BC Powers. Supervised crews on the Charlie/Delta side. LFD crews released. E-11 placed on D2 apt as there continued to be smoldering. Extinguished and did face-to-face with Command. Command releasing all rigs except E-11 and FM on scene. Safety returned to quarters with B-11. T-12 was dispatched to structure fire. T-12 changed over to Metro #1. T-12 arrived and began water supply for T-11. T-12 crew then grabbed an attack line off T-11 and began to enter structure in apartment A2. T-12 then repositioned to B-2. T-12 crew then performed extinguishment from the exterior with a hand line after Command switched to a defensive operation. T-12 then combined with M-12 to work in B-2 and then eventually C-2 where we were pulling ceiling and extinguishing fire and hot spots. T-12 then began to clean up and returned to service and Metro Main. T-12 returned to Station #2.

March 14, 2018, 11: 58 PM- Called for rekindle of fire in apt structure upon arrival we set up ladder pulled crosslay and T-12 hooked us up to a hydrant fire was on the outside wall at the soffit extending down the exterior wall made quick hit from outside then went inside and hit what we could not reach from exterior pulled ceiling over stairs down and pulled drywall from the wall down to where fire had reached on the outside of building also pulled drywall and soffit in both directions from the corner horizontally to make sure there were no extensions in any directions then applied water to blow blown

in insulation out of soffit area to avoid any spots for further rekindle. Loaded up all hoses and tools and cleared scene and returned to station.
