Good Intent Calls = 189	False Calls = 15

Fires Reported in FireRMS

March 22, 2018, 8:31 PM- Dispatched to a possible structure fire, report was that something was on fire in the hallway, everyone switched to Metro 1. Enroute, I contacted dispatch to make contact and see if they had any more info, and if the recommended best approach. I also, had dispatch tone out an Engine from Meridian. On arrival, nothing visible, updated location was residential / carport side, by door # 25. Established command and assigning T-11 to investigate on arrival, had station 2 units pull up to the structure since hydrant was nearby. T-11 crew made entry, T-11 driver reported hydrant was out of service. Had MTFD engine and BC level 1 stage on by other hydrant. On T-12's arrival, had them prepare for High-rise attack if needed. T-11 interior reported sprinkler head activated with water flowing, made their way to 3rd level found a burnt light fixture that had caught fire and was extinguished by sprinklers, no active fire at this time. Switched assignment for T-12 crew to shut down water to sprinkler system. T-11 interior stated that they were working to plug sprinkler and FF reported that he and maintenance had shut the valve down slowing water flow to head. Cleared MTFD units, advised dispatch of situation, T-11 could handle, passed command to them. All other units cleared.

March 23, 2018, 2:33 PM- Dispatch advised that there was a light that burned and they would like to confirm no further issues. No fire at this time. T-11 clearing from another call when this came in. Responded emergent with 3 on board to above. This was a single story health care facility. Met near door and escorted to room of origin. Visual alarms sounding, patient doors closed and hall fire doors closed. Upon entering room, saw water on the floor and a light cover removed from a wall light. All wires capped but one. It was reported that someone was working on the light, while a patient was still in the bed, and something caused the wires to spark, arc, and land on the bedding of the pt. It was observe that a bed pillow had a large burn hole in it which was removed to outside (approx. size = 1/2 a volleyball). There was charring to the bed cover and bed sheet however minor in size. It was reported that the worker rec'd an injury and was being evaluated. He was nowhere to be found. The patient was removed from the room and was not reported to be injured. Pull station activated by nurses station was reset and panel reset back to normal. Contacted FI Stover to advise of above. Stated he would follow up on this call.

March 24, 2018, 12:21 PM- T-12 dispatched with B-11, T-11 and M-11 for structure fire at disp loc in Meridian Township. T-12 responded emergent with three on board from St 2. T-12 ATF a medium three story single family residence with smoke coming from the Charlie side, two MTFD engines, MTFD Command and B-11 OS. T-12 staged level 1. Command initially assigned T-12 on deck at E-92. T-12 responded on deck with full PPE and SCBA, irons, TIC and New York hook. T-12 performed a 360 and found two 1 3/4" hand lines stretched to the Charlie side of residence, one advanced into the Bravo/Charlie entrance and the second at the Charlie side deck stairs, fire knocked down and overhaul being performed by MTFD. Command reassigned T-12 to pull siding from the Charlie side of residence. T-12 pulled siding from the Charlie side wall, Charlie/Delta corner searching for extension. No fire extension found. Command released T-12. T-12 cleared and drove to St 1 for equipment.

March 26, 2018, 4:41 PM- Dispatched for structure fire at abandoned house. B-11 on road and responded emergent. Placed on Ing Tac 1. Proceeded to location to find only an Engine from MTFD present along with STO and BC. Reported to BC who instructed T-11 to stage by hydrant on back side of old L&L. Upon arrival, M-11 joined T-11. DC in Command Car with MTFD BC. Heavy smoke upon arrival but within short time MTFD stated under control. T-11/M-11 placed on deck. This was an abandoned house and garage on the other side of a berm behind L&L. Garage was burnt to ground but house was not damaged. Walked the area of damage. Significant grass fire damage all appeared under control. Reported back to BC. All ELFD rigs were cleared the scene by MTFD BC. Reported back to Dispatch and returned to fire main

March 22, 2018, 7:21 PM- Responded to a possible structure fire, oven fire contained to the oven. On arrival, nothing visible, established command and assigned T-11 to investigate, station 2 units to level 1 stage on arrival. T-11 reported no fire, extinguisher was used, all units can clear. All units cleared, transferred command to T-11 who remained on scene.
