Fires Reported in FireRMS

May 25, 2018, 1:24 PM- Called for motor on fire in building upon arrival fire was out it had started in an electric pump motor the power was shut off at breaker and fire went out turned over to maintenance man on site no fire no smoke smell of electric fire cleared scene and returned to station. We looked under balcony and found a bed of mulch with many cigarette butts. Found no burning or smoking material. Met staff at E11. Advised him of Fire Marshall Visit tomorrow. Told him to perform any maintenance he deemed necessary tonight.

May 25, 2018, 12:33 PM- Called for fire in a home in MTFD area. Arrival and advised to enter A Side for fire attack on the 2nd floor. Went to the 2nd floor via stairs, Met with E93 and got report. Went to fire room and put out the left over hot spots and fire. Vented rooms on the 2nd floor and checked for extension. Attic clear of fire and heat with the TIC, Checked all rooms also with TIC. All fire out. Reported to command and rehabbed. Advised to check for any more extension in C, D corner. Breached wall in that corner bedroom no fire extension found. Overhauled entire area. Rechecked attic area. NO smoke or heat found. Reported to command and rehab... Then we cleared

May 27, 2018, 12:08 PM- E-11 responded for a mulch fire under a deck. On arrival, the resident of G-8 under whose deck the fire was burning, was completing extinguishment with a fire extinguisher from the building. We investigated the area and found it still smoldering. We applied water to fully extinguish and prevent re-ignition. We used the TIC to evaluate the exterior wall and AC unit of the garden level apartment outside which the fire occurred. I attempted to make contact with the resident of that apartment but was unable. At this time I felt there was no cause to force entry. We advised dispatch to contact DTN and we stopped at the clubhouse to advice staff. We also delivered the fire extinguisher to them.

May 28, 2018, 12:42 PM- E-11 was dispatched to Station #2's area for mulch fire. T-12 at Station #1 took the run and en-route. Dispatch stated on scene someone used extinguisher and fire is extinguished. T-12 at mulch fire burning in bed against a 3 2 story apartment. There was an outdoors ash tray within the immediate area. T-12 overhauled and extinguished the mulch bed. Maintenance contacted and apartments #101 and #102 were investigated from within the structure with the TIC to ensure fire did not enter structure. There was brick on exterior of building and copious amounts of water was used to extinguish the bed. T-12 gathered info. And notified maintenance to keep an eye on that specific area for hours. T-12 cleared the scene and returned to Station

May 31, 2018, 3:38 AM- E-11 responded to a utility pole fire in this resident's back yard. On arrival, the fire was out, but winds would occasionally cause the smoldering remains to flare up. It appears the insulator supporting the primary line at the top of the pole gave way and allowed contact with the pole causing fire. The surrounding residents all had power and the line was still up on the pole. BWL was contacted and we walked to the neighbor to investigate possible truck access from his driveway. We remained on scene until BWL arrived. We gave him a brief report and he required no further assistance from us. All fire damage was contained to the pole.

Training Reported in FireRMS

May 25, 2018, 4 hours- Metro RIT at Otto Middle School. Two downed firefighter evolutions. Heavy command involvement.

May 29, 2018, 1.5 Hours- Review of protocol changes set to occur on 6-6-18.

May 30, 2018, 1 Hours- Protocol updates by Fire Fighter Matt Sterling
