### Fires Reported in FireRMS

**July 2, 2018, 5:16 PM-** T-12 responded to a fire alarm. T-12 atf large 3 story apartment with nothing showing. T-12 investigated to find that alarm was sounding due to smoke head in #302. T-12 found door locked on 3rd floor with the strong smell of something burning. T-12 finally made entry to find apartment filled with a moderate amount of smoke and nothing obviously on fire. T-12 est. Command and requested a full EL Fire response and switched to Metro #1. T-12 crew narrowed the fire area down to a mechanical room in the living room which housed the furnace. T-12 shut the gas off and electrical which was tripped to the unit. T-12 then overhauled the furnace and extinguished what was left of the smoldering furnace filter. T-12 crew extinguished the fire with a water can and then requested E-11 begin ventilation on 1st floor. B-11 notified of situation and maintained Command. Command cleared M-11. T-12 crew awaited ventilation completion and cleared E-11 as well. T-12 remained on scene and searched remaining area with TIC to confirm no further extension. Command met with Tom Welburn of MSU Residential and Housing and passed info. and maintenance onto him and MSU IPF. T-12 terminated Command and cleared the scene returning to ELFD main.

**July 2, 2018, 6:17 PM-** Called for mulch on fire started by cigarette employees of the business were trying to extinguish it when we arrived they had used an extinguisher and a spray bottle to try to put it out we pulled the trash line and doused the mulch good. fire was out we cleared scene and returned to station.

**July 3, 2018, 12:23 PM-** Received dispatch of structure fire. While getting bunker gear on at the truck, Capt. reported he could see a column of smoke in the Pkwy area from our position at Station 2. Upon arrival, heavy smoke and fire were seen on the exterior of the C/D corner. Capt. ordered a 1 3/4" crosslay to be stretched to the fire for a quick knockdown on the exterior. FF assisted in pulling the crosslay. I stretched the line to the C/D corner. (T-12 driver) charged the line and an exterior attack was applied to the exterior of the C/D/ corner. A majority of the fire was knocked down quickly. M-12 crew joined Capt. and me at this point. All visibile exterior fire was extinguished. Capt. then ordered me and M-12 crew to make entry intio the walk-out basement door, located on the C side near the C/D corner, and check for extension. No obvious

extension was found and there was very light smoke in the area. My crew then walked up the stairs to see if there was access to the upper floors. There was access to the first and second floors but we did not have enough hose length to continue. We then exited the building and had face-to-face update w/ Capt.. I advised him that we knew where the access was to the second floor but did not have enough hose length to make entry. We decided that pulling the attack line back and entering the A side front door. Capt. stayed on the exterior of the C/D corner to help with operations. T-12 interior crew then proceeded through front door, upstairs to the top of the second floor landing. There was an access door to the attic in the second floor hallway. This access was opened and contained a folding ladder. Attic also had heavy smoke but no visible fire. Firefighters then took the charged hoseline to the top of these stairs and scanned the attic with TIC to check for fire extension. Excessive heat was noted in the C/D corner, running up the peak to the C side. Crew on roof then cut vent hole allowing smoke to escape and fire to be seen. Water was then applied to the fire and knocked it down. T-12 interior crew then exited the structure to recycle.

Following recycle, next assignment for T-12 crew was to access C/D corner soffit and open it up to check for fire extension. Area accessed via T-12 aerial and hole cut in D side wall with vent saw. Soffit also opened up on D side with vent saw. No obvious fire found. T-12 crew again recycled after this task.

T-12/M-12 crews then assisted with clean-up activities

**July 3, 2018, 2:01 PM-** While at end of structure fire event, LFD called for a car fire at Ramp 8. B-11 cleared to meet LFD at possible fire. B-11 en route with three, STO and LD FF. Arrived on scene to find car half way into parking structure. MSU PD out with vehicle and keeping cars away. Approached vehicle to see a light haze come out of engine compartment, within the car and from the trunk. All doors locked and owner not accessible. Advised incoming LFD that water can only thing needed. Hood and trunk warm but not hot. LFD accessed the car by taking the driver's window. Located occupant's keys and opened trunk and released the latch for the hood. No fire in the engine compartment or in passenger compartment. Trunk revealed a smoldering tail light that had burned some paper products nearby. LFD extinguished with water can. MSU FM on scene. Advised he will take care of the situation from here. LFD cleared, advised Dispatch of findings. Cleared the scene.

**July 6, 2018, 13:36 PM -** Dispatched to mulch/bush fire. Truck-12 responding from Station-2. Updated enroute that fire is believed to be out. Arrival notes maintenance crew using garden hose and buckets to douse bush and mulch. Fire is completely out, no smoke remaining. Fire consumed the bush and an approx. 4'x4' area of mulch. DTN property mgt. personnel on scene advises they are going to turn sprinklers on the area since it is so dry.

**July 15, 2018, 3:31 PM-** Called to car fire. ATF engine compartment involved. We pried open a corner of hood and extinguished with 1 3/4" front jump line. Then used K12 saw to fully open

the hood and mop up the hot spots. I obtained info from owner as firefighters continued overhaul, and placed tools back on engine. Car was turned over to towing.

### **Training Reported in FireRMS**

**June 28, 2018, 2 Hours-** Water Rescue Training, Annual Water Rescue training consisting of lecture and practical time on Lake Lansing.

**July 5, 2018, 2 Hours-** Lt did a 1 hour lecture on Fire hose, nozzles, and friction and pumping calculations.

**July 10, 2018, 2 Hours-** PPE turn out gear inspections

**July 10, 2018, 2 Hours-** Practiced using phase 1 and phase 2 in elevator emergencies. Practiced opening outer elevator doors. Inspected elevator mechanical room and discussed shutting main power off during rescues

**July 11, 2018, 2 Hours-** Performed pump operations with T-12 at Station #1. Driver's utilized the hydrant to simulate a structure fire with concentration on pumping T-12, hydraulics, and calculating friction loss.

**July 13, 2018, 2 Hours-** MSU IM lifeguards invited us to observe them performing pool rescues. Discussion about what we would like from them during an emergency.

**July 17, 2018, 2 Hours-** Laddered the parking garage at Division while testing FF Perna to be a driver

**July 17, 2018, 2 Hours-** Standpipe and attack evolutions at Division

**July 18, 2018, 2 Hours-** Watched video and discussed high rise tactics, and watched another video and discussed risk management.

### **Chief Complaints of EMS Call**

Abdominal Pain- 6	Back pain-1	Chest pressure-1
ABD pain with N/V-1	Back pain from a fall-1	Confusion-1
Alcohol detox-1	Bleeding problem-2	Constipation-1
Alcohol intaocication-1	Bug bite-1	CP-1
Allergic reaction-3	Car vs. pole approx. 10MPH-1	CP (brief Episcopo)-1
Allergic Reaction-3	Cardiac                      Respiratory	Deconditioning-1
ALO-1	Arrest/DOA-1	Diabetic Evaluation-1
Altered level of conscouios-2	Chest Pain- 7	Diarrhea-1
Altered mental status-9	Chest pain/ back pain-1	DIB-5

Dislodged feeding tube-1	HTN/ chest discomfort-1	Plastic ingestion-1
Dizziness-1	Hypoglycemia-1	Possible heat exhaustion/ stroke-1
Dizziness-1	Incapacitated.      Altered mental status due to ETPH-	Post seizure-1
Dizziness      &      Chest Discomfort-1	Intoxicated-1	Psych issues-2
Dizzy-1	L Elbow Pain-1	Puncture wound to right foot-1
DOA-1	L knee pain-1	R knee pain-1
Dry Mucus Plug-1	L shoulder pain-1	Right wrist pain-2
ETOH-4	Left leg bleeding from sore PT intentionally picked open- 1	Seizure-1
ETOH Withdrawals-1	Left leg pain-1	Shortness of breath-1
Facial injuries-1	Left shoulder pain-2	Sob on exertion-1
Fall-8	Left assist-3	Sort throat-1
Fall of bicycle-1	Lower abdominal pain-1	Suicidal Ideation-1
Fall from Chair- landing on back and head-1	Lower back pain-1	Syncope-5
Fall/ lift assist-1	Minor burn from airbag-1	Tachycardia-1
Fatigue-1	Minor laceration-1	Trach needs suction-1
Febrile-1	Nausea and Vomiting-3	Unresponsive-2
Fever-1	Nausea, vomiting-1	Intoxicated-1
Fistula Bleeding- 1	Near syncope episode-5	Upper adnominal pain-1
Generalized weakness-2	Neck pain-3	Vomiting-2
Head injury-1	No will to live-1	Weakness-6
Head pain-1	Not feeling well-1	Wound on left leg -1
Headache-1	Overheated- 2	
Hearing voices-1	Overdose-1	
Hot flashes-1	Partial seizures-1
