Fires Reported in FireRMS

September 30, 2018, 6:03 PM- Called to a structure fire where occupant dropped noodles on stove, catching on fire. ATF her outside, with no alarms activated, stating she had pasta that spilled on cooking surface and ignited, and was spreading. I investigated as Lt grabbed a water can and followed. Inside smelled like burnt food, and no fire was found, only stinky pasta noodles. I advised command no fire, and T-11 could handle. He cleared station 2 units, both medics as I obtained contact info and cleaned up blackened pasta from stove top. I advised her to open windows to vent out some smell, and when burners cooled down she could clean up the rest of the mess and try again. We cleared scene, returned to Fire main, and returned to station 1.

October 1, 2018, 3:15 PM- East Lansing Fire dispatched to assist Meridian Township Fire on a structure fire at 1515 hours. Truck and Battalion 11 were assigned to the call and responded with four personnel. Both units switched to Ingham Main radio channel. Truck arrived and assigned on duty on the alpha side of the building. Truck crew geared up and went on duty. Once the area was cleared by the Meridian crews, Truck 11 was cleared by Meridian Command. Truck cleared and returned to quarters.

Training Reported in FireRMS
