**Fires Reported in FireRMS**

**November 17, 2018, 2:13 pm-** Dispatched to location for a fire alarm. Upon arrival FCP showing smoke head activation room #610. Upon investigation found a small amount of burnt paper on register vent. No smoke/Fire. FCP reset to normal. Cleared with dispatch.

**November 20, 2018, 1:19 am-** East Lansing Fire dispatched to smoke in a in the City of East Lansing at 0120 hours.

A full box alarm for East Lansing Fire Department was called with 11 personnel responding. Dispatch advised that the call came in as a motion detector and Police reported that the building was full of smoke. Engine 12 arrived and reported smoke showing from the eaves of the building and the front door. Smoke also visible at the bravo/Charlie side of the building. Battalion requested two Engines from Lansing Fire. Battalion arrived behind Truck 11 and positioned to view the front (alpha) side of the building. Battalion reported working fire and assigned Truck 11 to complete water supply to Engine 12. Engine 12 crew made entry to front in the west door of the building. Reported medium smoke and little heat. Truck 11 reported water supply done, Truck 11 reassigned to give roof report. Engine 48 arrived and assigned to enter the east entry to the building. Reports from interior stated that there was a fire wall in the middle of the building. The East entry and side of the building was labeled Building 1 by Command, the West side entry and side of building was labeled Building 2 by Command. Engine 41 arrived and was assigned to back Engine 48 in building 1. Roof report from Truck 11 was given as no smoke on the roof, no sign of fire through the roof. Truck 11 reassigned to back Engine 12 crew in building 2. Engine 12 reported that they were recycling. Engine 12 officer gave face to face with Truck 11 crew and went to change air. Truck 11 contacted Command and reported that they were entering the building and continuing Engine 12 task of checking for extension. Command requested another Truck and Medic unit from Lansing Fire. Battalion 41 arrived and was assigned to assist Command at Command post. Engine 12 officer reported to command that there was a small fire in the alpha/bravo corner of building 2 and that the Engine crew had extinguished the visible fire. Engine 48 found minor extension on the other side of the fire wall and checked for other extension in building 1. Truck 41 and Medic from Lansing Fire arrived, Truck assigned to on-deck RIT on the alpha side of the structure. Medic

unit stood by. Dispatch also requested Dispatch to notify the Chief, STO, and Fire Prevention. Positive Pressure Ventilation started and cleared out building one. Crews continued to pull ceiling in both building in extension search. Some smoke noted in front area of Building 1 and exterior soffit pulled for extension check. Engine 48 and 12 checked for extension in Building 1. Engine 48 and 12 went to roof chasing light smoke from building 1. No extension found, Truck 41 was cleared from the scene. Once tasks completed by Engine 41 and 48, both crews were cleared from the scene. Battalion 41 cleared and returned to quarters with the stand by medic from Lansing Fire. Chief and StO arrived and checked in at Command Post. Fire Inspector Stover arrived on scene and briefed by initial arriving companies. Battalion 11 cleared the scene and returned to quarters and turned Command over to Engine 12.

**November 21, 2018, 4:43 pm-** T-11 and M-11 disp for 19 yo male burns to face from grease fire, fire out. T-11 responded emergent from St 11 with three on board. T-11 ATF small 3 story apartment building with nothing showing, no audible alarms and injured occupant walking towards T-11 personnel. Injured occupant walked to M-11 for evaluation and treatment. T-11 entered the Delta side main entrance in full PPE and followed occupant, Hasaan Hayat, to Apt 302. T-11 found heat damage in the kitchen, the room in which the grease fire occurred. Signs of heat damage were melted window blinds, melted sides of cabinets over the sink, soot covering cabinets and counter as well as soot markings on the ceiling and walls. The pot that contained the hot oil was upside down on the kitchen floor across from the room from the stove, oil was splattered against the wall and dry chemical powder for an extinguisher was dispersed throughout the apartment. stated, "A pan of grease on the stove began to smoke and before they could remove it from the stove the oil flashed and began to burn. attempted to douse it with water and the oil splattered causing the burns. A dry chemical extinguisher from the hallway was used to extinguish the fire." FI Stover was contacted via cell. A smoke detector was identified as missing from the hall ceiling. produced the missing smoke detector which had been removed by one of the occupants after activating. T-11 reattached the smoke detector and tested it by depressing the test button. FI Stover OS, T-11 transferred report and scene control to FI Stover. FI Stover released T-11, T-11 cleared and returned to St 11.

**November 23, 2018, 8:16 pm-** MTFD requested mutual aid for a fire alarm where they had found smoke in the building. The cause of the smoke was a mattress that had been pushed against a baseboard heater unit. On arrival, T-11 was advised to level 1 stage by B-11. At that same time, MTFD interior crews advised command that there was no fire and that they needed to ventilate. MTFD command cleared ELFD shortly thereafter.

**November 25, 2018, 3:15 pm-** Dispatched to a car fire. Arrived to find car just South of the traffic light at this intersection. Found ELPD on scene with the driver, away from car, where driver stated he was the only occupant. Found car parked and flames coming from engine compartment. Flames had burned through the center of the hood. Used water from front booster line to extinguish fire. Opened passenger doors, confirmed no one in the car, and cleared out smoke. Tried hood release and it did not work. Used rotary saw to cut around

hood latches and opened hood. Soaked entire engine compartment until fire out and hot areas cooled.

Driver stated he was in line at traffic light and the car just shut off and then began smoking. He exited car and called for fire dept.

After fire was out, we found battery in truck. Cut section of negative cable out. Found wire coating on negative cable to be melted near battery.

### **Training Reported in FireRMS**

**November 20, 2018, 2 Hours- Fire Behavior-** Captain discussed fire behavior relating to Flashover. I presented with an informational PowerPoint and then we watched multiple videos with regards to flashover training at Station #2.

**November 28, 2018, 2 hours- Search and Rescue-**Followed a charged line under and around obstructions, up the stairs to mezzanie while blacked out and on air. Removed blackout and then went back on air, did a bail out using a ground ladder of the mezzanie. Then went through a stud wall into hose tower. Tied a rope with gloves on onto a negative pressure fan. Climbed the hose tower then split lifting the fan up to top then lowered back down. Came down from hose tower then identified proper mayday with grab lives procedures. Then went back thru stud wall. Evolution over.
