**Fires Reported in FireRMS**

**December 16, 2018, 2:15 AM-** Called for structure fire went enroute in B-11 upon arrival gave size up and instructed T-11 to set up and pull lines added M-11 to their crew gave T-12 an assignment to hook hydrant and supply T-11 added M-12 to their crew we had one person with DIB from the structure so had 1 engine and 1 medic from Lansing respond LFD medic treated and transported pt. T-11 crew started attack from the outside of the fire apt that was about in the middle of the building after establishing a water supply I sent T-12 into the Delta apt to check for extension E-48 arrived and I sent them into the Bravo apt to check for extension they had fire in the attic space they came down and got a hand line off T-11 and went back up to extinguish T-12 found no extension into the Delta apt so they went to Charlie side and accessed fire apt they made it to the basement and knocked down the remaining fire in the fire apt I called for another medic and fire crew and got 514 from Lansing Twp. I had them set up rit a third person showed up on a truck from Lansing TWP E-48 had fire in the attic and there was smoke and flames out the roof vent on the Bravo end of the building so I set up for roof vent and had E-48 move to Bravo 2 apt to pull ceiling they found fire they had extinguished the attic as T-12 was cutting the vent and called for them to stop since fire was out T-12 did not complete the vent hole fire was out. I had crews go back into each apt to do secondary search all clear on all apts cleared LFD T-11 and T-12 crews were changing bottles and catching a rest so I sent Lansing Twp. crew to hit hot spots in fire apt they made it to the basement hitting hot spots until they had to recycle sent T-12 crew in to fire apt to overhaul and hit hot spots they came out for another bottle so I sent T-11 crew in to do the same they requested a fan to clear for better visual the board arrived and turned off electric and consumers arrived and turned off gas. T-11 found fire in floor of first floor under heat runs so they pulled them and extinguished the hot spots fire out had board up crew called to secure building cleared Lansing Twp. started cleanup turned command over to T-12 They called for red cross for displaced residents called fire inspector he made contact by phone but did not come to scene.

**December 17, 2018, 10:06 AM-** T-12 was dispatched to a fire alarm. T-12 updated in route that caller states no fire or flames and only reset needed. T-12 at large 5 story structure with some occupants evacuated and nothing showing. T-12 investigated to find that alarm was sounding due to x2 heads.T12 investigated further to find that occupant had placed a coffee pot on the stove top and melted some plastic. T-12 reset fire alarm system to normal operation. No need for ventilation. T-12 cleared the scene.

**December 20, 2018, 3:24 PM**- Called to car fire on Saginaw. ATF a 4 door passenger car with heavy fire coming from rear of vehicle. Driver states he had a flat that caught on fire, and spread quickly to cargo area. We used less than 100 gal of water to extinguish, and waited for tow truck to clear the car from roadway. Assisted owner by retrieving some belongings from the car, and cleared

**December 27, 2018, 9:21 PM** - Dispatched to assist to MTFD for possible kitchen fire. Enroute emergent from Station 1 with 3 aboard Truck 11. Prior to arrival advised to go to Ingham TAC 1. Command on scene radioed for Truck 11 to go on Deck upon arrival. Truck 11 arrived, proceeded to On Deck. After MTFD ventilated structure and found no fire extension, Truck 11 cleared by command. Truck 11 back to Fire Main, available.

### **Training Reported in FireRMS**

**December 15, 2018, 2 Hr. ONGT ongoing Training & Evaluation-** FF performed pumping operations and aerial waterway operations utilizing multiple hand lines and aerial waterway. Operations included pumping from tank water, establishing a hydrant connection, transferring from tank to hydrant water, trouble shooting pressure losses and water supply loss.

**December 19, 2018, 2 Hr. Drill- Manipulative Drills-** Drilled with new SCBA. All participants practiced buddy breathing.

**January 2, 2019, 2 Hr. ONGT ongoing Training & Evaluation -** Pump operations utilizing T-11's aerial water way, one 1 3/4 hand line, one 2 1/2 hand line with Blitz nozzle, one 5" discharge line to E-11, hydrant supply via 5" and hydrant supply via 2 1/2 gated wye with 2 1/2 hose line. Relaying pumping, aerial set up and master stream use was accomplished successfully by 7 Fire Fighters.
